

# Rail Transportation

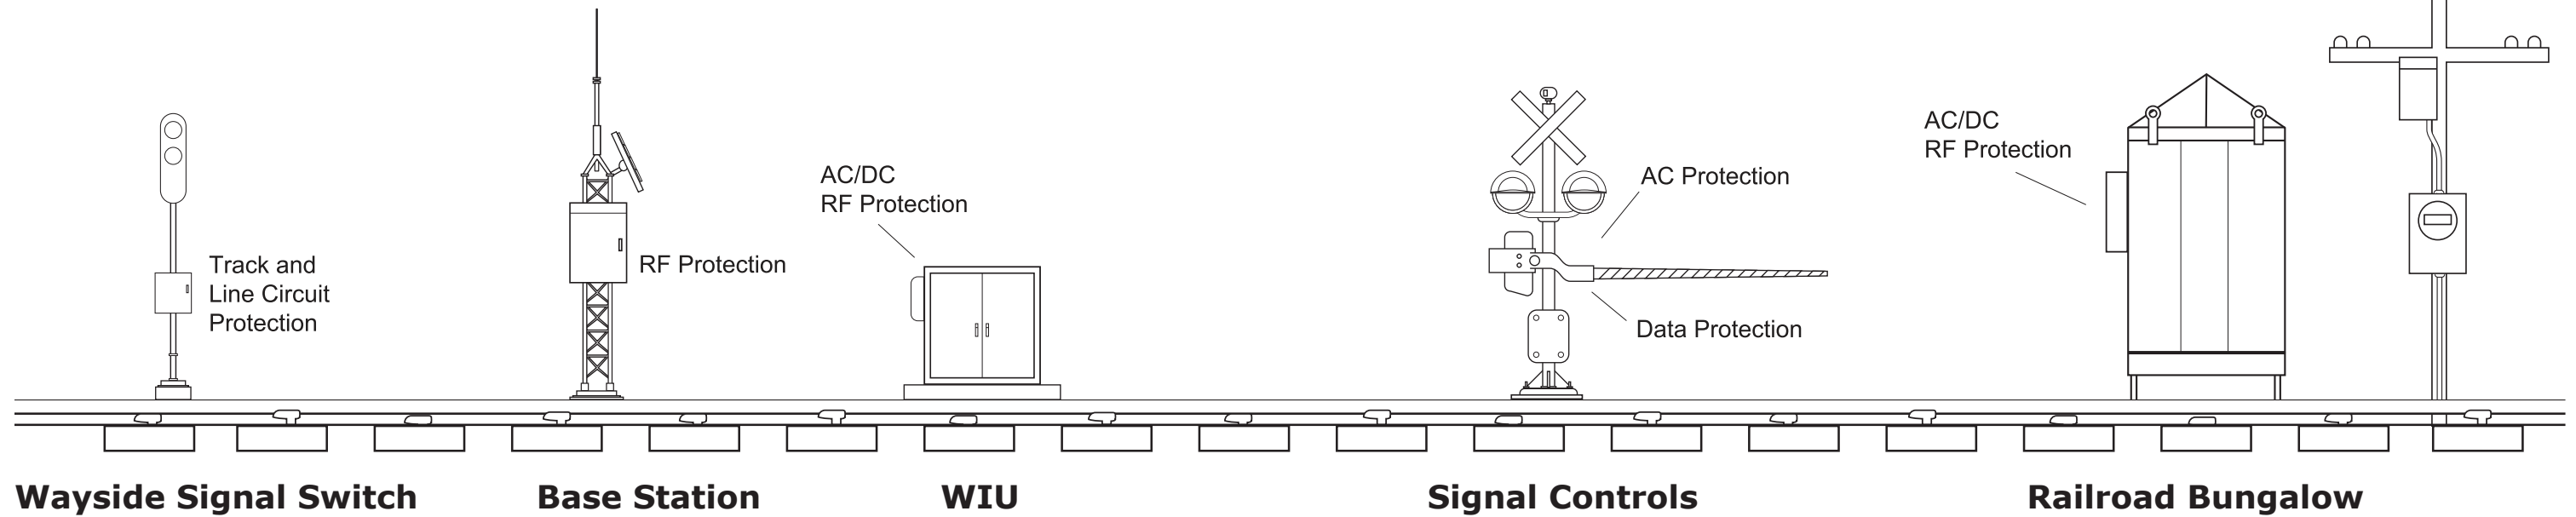

## Positive Train Control

Railway communication systems are vital to safe and profitable rail operation, but can easily become vulnerable to lightning and power anomalies. PolyPhaser, Transtector and LEA provide RF, ac, dc and data line surge protection solutions for onboard and wayside rail applications required for Positive Train Control deployment. Contact our dedicated PTC sales and engineering teams at 1.800.882.9110 or 208.772.8515 for further information and network support.
