

Telecommunications

Cellular Backhaul Network

Mission critical communication providers protect their systems from maintenance costs, equipment replacement outlay, lost revenue and customer dissatisfaction by investing in transient surge protection. The network drawing is designed to provide a basic understanding of RF, ac, dc and data line protection placement in the backhaul network. Contact the Protection Technology Group at 1.800.882.9110 or 208.772.8515 to further review your specific communication network and surge protection requirements.
